Frequently Asked Questions.

Q: How does BellMinder connect to my school bells?

A: Simply connects in conjunction with your existing manual Bell Switch, or PA System.

Q: We don't have any Bells, we use a hand Bell.

A: No problem, talk to us we will have a solution.

Q: Does my PC need to stay powered on?

A: No, The PC is used to design the time table, then the BellMinder takes over the ringing operation. The PC can be disconnected if you wish.

Q: We have an automatic Bell System now, why would we change to BellMinder?

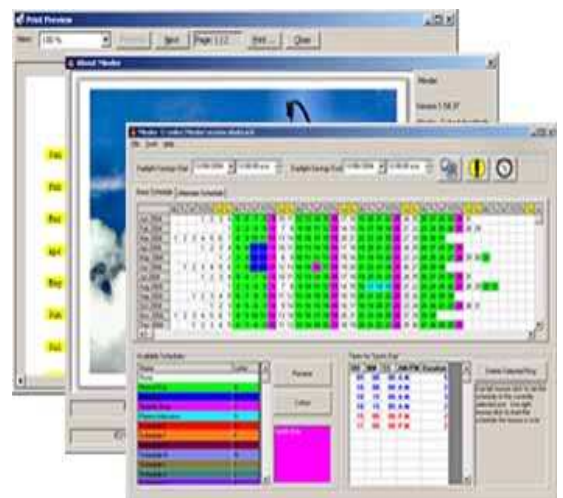

A: Many schools have made the change from an automated system to BellMinder. The flexibility and ease of use makes BellMinder so compelling.

Q: Why get BellMinder when we get the students to operate the Bells?

A: Operating the Bell is an important task. Schools have told us the pupils lose interest, out of class approx 45mins per day to ring the bell, are frequently unreliable and the office staff need to monitor the Bells anyway.

Q: For parent interviews I ring the Bell every 10 minutes can BellMinder do this for me ?

A: Yes, a repeating ring can be activated and stopped automatically.

What other Schools are saying

Teresa Kamana, School Secretary, Sylvia Park School - Auckland, NZ

Life before BellMinder can only be described as chaotic. I was tied physically in the office. BellMinder really works for us, instead of the other way round!

Robert Dowdell, Deputy Principal, Sydney Boys High School - Sydney Australia

The BellMinder unit has been reliable and accurate. Adjustments to bell times have changed from being a chore to a delight. This is an outstanding product.

Ron Warbrick, Property Manager, Onehunga High School - Auckland NZ

We already had an automated Timer—but changing the schedule was so difficult we kept reverting to a manual system. With BellMinder we replaced the old system and would never turn back—we have total control in a fraction of the time...
'Highly Recommended'

Bob Cumming, Deputy Principal, Opihi College, Temuka - South Island NZ

We find 'BellMinder' a great device and the software is extremely easy to use. Our bells were previously automated with an extremely complex programming setup with limited options. Using 'BellMinder' to control our system and being able to program (directly from the desktop) times and events so far in advance, as well as at very short notice, is proving a bonus.

Tim Hall, Principal Rift Valley Academy - Kenya

After months of research online, BellMinder is the only program we found that provides a "year at a glance". In terms of being user-friendly, no other system compares! I honestly cannot think of any additional feature we could need.
